

# Bluedig

## 2D Machine Control

Precision made simple & affordable.

Delivering  $\pm 1\text{cm}$  accuracy at the bucket tip, it enables precise depth control, single or dual slope grading, and full 360° operation from within the cab.

### Key Features

- Fully wireless system using chargeable sensors
- 8" rugged Android tablet with real-time visual and audible guidance
- Self-install calibration wizard - setup in around 1 hour
- Chassis & slew monitoring for consistent grade accuracy
- No additional sensor needed for tilting hitch / bucket
- Easily transferable between machines with additional sensor plates

### Benefits to Your Operation

- Typical return on investment in approximately 60 days
- Improved site safety – no need for manual grade checking
- Reduced fuel use, materials, labour costs, and machine wear
- Eliminate rework – dig it right first time

Body

### What's Included
